SUMMARY

A product-driven Computer Science Engineer with hands-on experience launching an AI-powered consumer app from ideation to deployment. Comfortable translating complex data and technical logic into intuitive product features, clear user flows, and prioritized roadmaps.

EDUCATION

Bachelor of Engineering, Computer Science & Engineering — Graduated 2025

Don Bosco Institute of Technology, Visvesvaraya Technological University (VTU), Bangalore | CGPA: 7.1 / 10

PROJECTS

EngineerEase — AI Study Platform for VTU Students engineerease.com

- Owned end-to-end product strategy — including problem definition, scoping, and roadmap execution — for an AI study tool serving VTU engineering students across 39 branches and 233 subjects, with AI-generated answers, adaptive quizzes, and a community feed.
- Prioritized ruthlessly to ship a focused v1 solo across web, iOS, and Android: chose photo-scan question solving and accuracy-adaptive quizzes as the core loop over a longer backlog of nice-to-haves.
- Made the build-vs-buy call to integrate an LLM API rather than build in-house, trading model control for speed-to-market and lower cost.

Product Case Study — BigBasket Quick Commerce [View PRD](#)

- Wrote a full product strategy and PRD proposing a unified grocery-plus-pharmacy quick-commerce funnel for BigBasket: problem framing, competitive moat, user persona, success metrics, an illustrative API contract, and the regulatory risk of merging Rx with grocery fulfilment.

EXPERIENCE

AI Quality Data Analyst Intern — Rooman Technologies | Sep 2024 – Feb 2025

- Defined data-quality criteria and built validation pipelines that improved dataset reliability for downstream AI/ML use cases, using hypothesis testing and statistical analysis to decide what was good enough to ship.
- Translated messy real-world data into clear conclusions and recommendations for non-technical stakeholders.

SKILLS

Product: PRD writing, scoping & prioritization, success metrics, user flows, build-vs-buy trade-offs

Data: SQL, Python, Pandas, hypothesis testing, A/B reasoning

Technical fluency: JavaScript/TypeScript, React, Next.js, REST APIs, MongoDB, Firebase

Tools: Vercel, Git, Postman, Figma

CERTIFICATIONS

- **IBM Certified:** NLP-Based Automated Cleansing for Healthcare Data
- **Rooman Technologies:** AI / Data Quality Analyst
