SUMMARY

Computer Science Engineering graduate with hands-on experience shipping production full-stack applications using Next.js, React Native, Express, MongoDB, and Firebase. Skilled in integrating LLM APIs (OpenAI GPT-4o), payment systems (Razorpay), and authentication (Clerk, Firebase) into real products.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML/CSS, SQL

Frontend & Mobile: Next.js (App Router), React, React Native, Expo, Tailwind CSS, Zustand

Backend & DB: Node.js, Express.js, MongoDB (Mongoose), Firebase (Auth, Firestore), REST APIs

Cloud, Auth & Payments: Vercel, Railway, Cloudinary, Turborepo, pnpm, Clerk, Razorpay, JWT

AI/ML & Tools: OpenAI GPT-4o, NLP, scikit-learn, Pandas, Streamlit, Git, GitHub, Postman, Linux

CERTIFICATIONS

IBM — NLP-Based Automated Cleansing for Healthcare Data (Apr 2025) • **Rooman Technologies** — AI / Data Quality Analyst (Sep 2024 - Feb 2025) • **CompTIA Security+** (SY0-701) — In Progress

PROJECTS

Kernel — Industrial Hardware E-Commerce Marketplace

[kerneltools.vercel.app](#)

Next.js 16, Express.js, MongoDB, Clerk, Razorpay, Tailwind, Zustand, Turborepo

- **Built a B2B/B2C hardware marketplace** for the Indian market with product catalog, search/filters, cart, wishlist, RFQ (request-for-quote), bulk-order flow, project kits, and tool calculators (BOM generator, electrical, material estimator).
- **Architected a pnpm + Turborepo monorepo** splitting frontend (Next.js App Router on Vercel) and backend (Express.js on Railway) with shared TypeScript types, UI components, and ESLint config.
- **Integrated Razorpay checkout with server-side payment verification**, Clerk authentication with JWT-based role gating (customer / seller / admin), and Mongoose schemas for products, orders, RFQs, and returns; backend exposes a versioned REST API with rate limiting and validation middleware.
- **Built admin and seller portals** covering catalog, orders, inventory, payouts, coupons, flash sales, returns, fraud detection, and warranty claims.

EngineerEase — AI-Powered Study Platform for VTU Students

[engineerease.vercel.app](#)

Expo / React Native, Firebase, OpenAI GPT-4o, Cloudinary, Vercel

- **Built a cross-platform app** (web + iOS + Android from one codebase) for VTU engineering students with AI-generated answers, syllabus-wide lessons, MCQ practice in three modes, study analytics, and an Instagram-style community feed.
- **Integrated OpenAI GPT-4o via a server-side Vercel proxy** to keep the API key off the client; supports photo-scan questions, mark-weightage calibration (2/5/10 marks), and adaptive quizzes that scale with user accuracy.
- **Designed Firestore security rules and Cloudinary upload presets** so users can only modify their own data and uploads are scoped to safe presets; auth handled via Firebase (email/password + Google Sign-In), navigation via React Navigation 7 across 10+ screens with real-time Firestore updates.

Healthcare Data Cleansing Tool

Python, Streamlit, scikit-learn, NLP | IBM-Certified

- **Built an end-to-end web tool** that cleans and standardises healthcare records via CSV upload or manual entry, with downloadable cleaned-data export.
- **Implemented text standardisation, duplicate detection, and blood-pressure validation** to normalise diagnoses and medication names, deduplicate patients by Name + DOB, and flag invalid BP readings.
- **Engineered an anomaly-detection module using Isolation Forest** to surface statistical outliers in numerical fields; deployed a Streamlit web interface for non-technical users.

EXPERIENCE

AI Quality Data Analyst Intern

Rooman Technologies • Sep 2024 - Feb 2025

- **Applied statistical concepts** (probability distributions, hypothesis testing) and data visualization tools to real-world datasets; built data cleaning and validation pipelines to improve dataset reliability for downstream AI/ML use cases.

EDUCATION

Bachelor of Engineering, Computer Science & Engineering

Graduated 2025 • CGPA: 7.1 / 10

Don Bosco Institute of Technology, Visvesvaraya Technological University (VTU), Bangalore
